Top Notch

THE NEW GOLD STANDARD FOR SHALLOW GROOVING

Top Notch stands out as the most stable cutting insert on the market, known for exceptional performance and reliability. The new KCU10B and KCU25B grades now feature the KENGold™ PVD multilayer coating, which provides easy wear detection and boosts tool life, making them ideal for safe and efficient operations.

- Positive chipbreaker delivers very low cutting forces for excellent chip control
- Precision-ground inserts for accurate indexing, resulting in reliability and repeatability
- Improved cutting conditions for tool life, stability and rigidity
- Quick and easy tool switch for fast replacement of the insert's cutting edge
- Maximum insert holding power, eliminating movement and force shifts
