WIDIA 

 **ALL-STAR**

The All-Star Program reinforces the core qualities of the WIDIA™ diamond — providing proven solutions that are easy to find and always available.

With All-Star, customers can benefit from product reliability and quick delivery to increase machine utilization.

PROVEN SOLUTIONS

Products included in the All-Star program were chosen based on their proven performance and popularity. These industry-leading solutions combine versatility and productivity to deliver savings.

EASY TO FIND

It is easy to recommend All-Star on-the-go or in the shop while using tools like the NOVO™ tool advisor or the Machining Central app. To view All-Star products on widia.com, use the All-Star filter.

Available to download in the app store!

ALWAYS AVAILABLE

All-Star products are held to the highest availability standards. This means products that are flagged as All-Star feature same-day shipping for all orders received before 6pm EST.

8-Edged, Double-Sided True 0° Victory™ Shoulder-Face Mill (VSM)

- Superior Metal Removal Rates (MRR) delivered through high-performance grades and chipbreakers.
- Coarse, medium, and fine pitch cutter density to perfectly translate machining capability into higher productivity.
- New pocket seat design for improved insert seating and great stability at roughing applications.
- Comprehensive standard offering for cutter bodies and inserts to address light machining to heavy roughing jobs.
- Available in the new WU10PM™ and WS40PM™ grades.

- **Weldon® End Mills:** 1.25" and 1.5"
- **Shell Mills:** 2–10"

**Unique insert rake design to reduce and perfectly balance axial and radial cutting forces.
Engineered for light machining to heavy roughing in all material groups.**

★ -ALP

N

First choice for Non-Ferrous materials.

★ -ML

P M S

First choice for Stainless Steel, light machining, and finishing jobs.

★ -MM

P M K S H

First choice for general purpose in all workpiece materials. Engineered for high-feed rates.

Finishing Capabilities/Lower Cutting Forces

Geometry Strengthening/Stronger Cutting Edge Protection

WIDIA™ Victory™ WS40PM

Breakthrough in the latest substrate and coating technology to boost productivity in **stainless steels and high-temp alloys**

Advanced Milling Grade for Titanium

Multilayer PVD AlTiN-TiN Coating

- Improved chemical and abrasive wear resistance.
- Consistent tool life performance.
- Primarily for wet machining. Also great results in dry machining.

New Medium-Grained Substrate

- Minimizes tendency for thermal cracking.
- Excellent fatigue resistance and edge strength.
- Rich in cobalt content for improved toughness.

VSM490™-15

4-Edged, Double-Sided 0° Victory™ Shoulder Mill (VSM)

- True 0° roughing tool with embedded finishing capabilities all in one tool.
- Best-in-class wall finish in axial stepping-down jobs.
- Lower cutting forces and real soft cutting action.
- Perfect fit for taper 50 spindles.
- Coarse, medium, and fine pitch shell mills available.

- **Ap Capabilities:** Up to .591"
- **Weldon® End Mills:** 1–1.5"
- **Cylindrical End Mills:** .625–1.5"
- **Shell Mills:** 1.5–6.0"
- **M4000 Cartridge Milling System:** 6–12"

Super-positive rake design for low machine power consumption.

Integrated wiper facet for great surface floor finish.

Four insert geometries for all material groups in shoulder milling applications.

★ -ALP

N

For non-ferrous materials.

★ -ML

P M S

First choice for stainless steel.
Lower cutting forces.

★ -MM

P M K S

First choice, especially
when machining steels.

★ -MH

P K

First choice for cast iron,
and also recommended
for heavy applications.

Finishing Capabilities/Lower Cutting Forces

Geometry Strengthening

Wall Quality

Competitor Tool

Traditional tools are designed to achieve a 0° wall, but exhibit poor performance when machining walls in multiple passes.

VSM490-15

VSM490-15 eliminates the mismatch and minimizes the marks left behind in step-down milling operations. By increasing wall quality and avoiding a second tool, productivity increases significantly.

★ = ALL-STAR PORTFOLIO PRODUCT. ALL-STAR PRODUCTS ARE PROVEN SOLUTIONS THAT ARE ALWAYS AVAILABLE.

Machining Central App from WIDIA™

The fastest, easiest way to get feeds and speeds.

SCAN

With the new WIDIA app, product data is just a quick scan away. Now, when you're on the floor and need to quickly access the speeds and feeds of your favorite WIDIA tool, the WIDIA app gives you reliable information in just a few seconds.

SEARCH

Don't have a barcode? The new WIDIA app includes another simple search technique — just type the tool's corresponding order number or the ANSI or ISO catalog number into the search bar. You'll get the same reliable data as if you'd scanned the tool's barcode. It's simple and quick — no interruption in production!

CALCULATE

Have a specific machining need that our recommended speeds and feeds don't quite address? Try out our three NOVO™ based calculators. Both end milling and face milling calculators are available. Simply fill in the blank fields, and our calculators will quickly provide the data you need.

DOWNLOAD THE WIDIA MACHINING CENTRAL MOBILE APP

WIDIA 

VSM490™-10

4-Edged, Double-Sided 0° Victory™ Shoulder Mill (VSM)

- True 0° roughing tool with embedded finishing capabilities all in one tool.
- Best-in-class wall finish in axial stepping-down jobs.
- Lower cutting forces and real soft cutting action.
- Perfect fit for taper 40 spindles and driven units.

- **Ap Capabilities:** Up to .394"
- **Weldon® End Mills:** .625–1.5"
- **Cylindrical End Mills:** .625–1.5"
- **Shell Mills:** 1.5–5.0"
- **M4000 Cartridge Milling System:** 6–12"

Super-positive rake design for low machine power consumption.

Integrated wiper facet for great surface floor finish.

Four insert geometries for all material groups in shoulder milling applications.

★ -ALP

N

For non-ferrous materials.

★ -ML

P M K S H

First choice for stainless steel, light machining, and finishing jobs.

★ -MM

P M K S H

First choice for general purpose in all material groups.

★ -MH

P K

First choice for HPC roughing cast iron. Strongest edge protection with additional margins.

Finishing Capabilities/Lower Cutting Forces

Geometry Strengthening

Applications

1. Face milling with modular M4000 cartridge milling system.
2. Full slotting with 100% radial engagement.
3. Shoulder milling with step-down capabilities and great wall finish.
4. Shoulder milling with low axial and high radial engagement.
5. Shoulder milling with low radial and high axial engagement.
6. HPC face milling. Excellent choice to clean up castings.
7. Trochoidal slot milling.
8. Z-axis plunge milling.
9. Contour milling.

FOR THE COMPLETE OFFERING, VISIT WIDIA.NOVO™ OR WIDIA.COM.

VARIABLE by WIDIA™

VARIABLE by WIDIA is a new tooling program that offers customers more ways to save while reducing tooling costs. This program will help you save on steel costs based on the number of inserts you buy — the more inserts you buy, the more you save.

Contact your local WIDIA sales representative for more information.

*Available Product Families:

- M1200
- VSM890™
- VSM490-10™
- VSM490-15™
- VSM11™
- VSM17™
- WGC

*VHM17 cutters are not included in this program.

Program Guidelines For VARIABLE by WIDIA

- Applicable for U.S. only.
- Free tooling limited to steel with no additional discounts on carbide.
- Please reference the appropriate ordering code on your P.O. when order is placed.
- Offer applies to qualified, standard catalog products only (Ferts), and is not valid in combination with any other offer or on exchange of current WIDIA products.
- Purchased and free items must be on the same order number.
- Program to be used for new business opportunities and not for existing repeat business.
- All orders must be for immediate shipment. Previous purchases, scheduled agreements, contract releases, blanked orders, and price concession orders are not covered by this program.
- All transactions are final. No returns are permitted other than defective products.
- Program is void where prohibited by law. All local, state, and federal laws apply.
- Ongoing program until further notice.

2-Edged, 0° Victory™ Shoulder Mill (VSM)

- True 0° shoulder milling platform.
- Aggressive ramping capability up to 8.5° with end mills with a diameter of 1".
- Optimized chip gash for improved cutter stability and chip flow.
- Well-guided internal coolant supply to the cutting edge.
- Best-in-class milling grade WS40PM boosts productivity when machining stainless steel and high-temp alloys.

- **Ap Capabilities:** Up to .638"
- **Screw-On End Mills:** 1–1.5"
- **Weldon® End Mills:** 1–1.5"
- **Cylindrical End Mills:** 1–1.5"
- **Shell Mills:** 1.5–6"
- **M4000 Cartridge Milling System:** 6–12"

Geometries for all material groups in shoulder milling applications.

Finishing Capabilities/Lower Cutting Forces

4-edged 0° Shoulder Mill

- Provides optimal chip evacuation, excellent shoulder finish, free cutting action, and solid tool design for optimal insert support.
- SDMX inserts — helical cutting edges for smooth cutting.
- Strong insert and tool design for maximum productivity.
- Excellent for slot and profile milling
- Four cutting edges enable excellent machining economy.

90° HIGH-SPEED CUTTING MILLS

VHSC

Pages A40–A43

Developed to achieve high-speed cutting of
aluminum components

AEROSPACE TECHNOLOGY

VHSC milling tools are designed for true HSC pocketing and profiling of aluminum alloy components in the aerospace industry, making it a first choice for components like airframe floor brackets.

WIDIA™ offers machining strategies and innovative tooling technology specifically engineered for the aerospace industry to increase productivity and reduce costs.

High-speed cutter for aluminum components

- Developed specifically to achieve true HSC cutting of aluminum components.
- Latest cutter body technology allows for heavy feeding and ramping.
- Flutes and internal coolant channels engineered to support improved chip evacuation.
- Best-in-class solution for thin-walled machining.
- Productivity booster up to 525 in³/min MRR.
- First choice for non-ferrous materials.
- Wear-resistant micro-grain carbide grade on inserts.

Up to $vc = 9843$ SFM

Applications

1. Face milling
2. First choice for deep pocketing and thin wall machining
3. Boring by circular interpolation into full material
4. Ramping
5. Pocketing
6. Slotting
7. Shoulder milling with excellent step-down capability and wall finish

User-friendly Setup Makes a Big Difference

Large Corner Radius

Small Corner Radius

- Unique feature has a great impact on significant cost savings.
- Only one cutter body needed to load inserts with corner nose radii from R.020" to R.236" max.
- All other suppliers require modification and rebalance of the cutter body.

Insert Overlay

- Axial gage length on the cutter body will always be the same, no matter which insert nose radius is applied.
- Preferred by CNC programmers and operators.
- Ap1 max will always remain .630", no matter which insert nose radius is applied.

WIDIA 

M1200 Mini

Best-in-class face milling platform to boost productivity on taper 40 spindle milling machines and driven tools.

- First choice for low depth of cut face milling.
- Low cost per edge and high productivity.
- Reduced cutting forces due to soft cutting action.
- Significantly increased Metal Removal Rates (MRR).
- Excellent tool life in light to heavy machining.
- Shorter machining cycle times.

Latest soft cutting edge insert design for all material groups

Best-in-class face milling platform to boost productivity on taper 50 spindle milling machines and driven tools.

- Low cost per edge, high productivity solution.
- High feed rates for rough face milling.
- 75°, 45°, and 31° lead angles.
- One series meets every face milling need.
- Available in WIDIA™ premium milling grades.
- Better tool life in light to heavy machining.

Materials:

12 Effective cutting edges

Comprehensive standard offering for coarse, medium, and fine pitch cutter bodies to match all shop floor needs.

Through tool coolant.

Easy-to-use — one screw enables fast, accurate indexing.

The latest technology with 12 true cutting edges and high-precision PSTS inserts.

WIDIA 

VXF is a high-feed productivity booster designed to establish new industry standards with market-leading milling grades.

- 16.5° lead angle redistributes cutting forces in the spindle z-axis direction.
- PSTS inserts for powerful low cost per edge high-feed milling.
- Cutters with internal coolant supply.
- Greatly reduces tool deflection and vibrations for improved tool life.
- Suitable for long tool reach.
- Unique integrated radial wiping facet to achieve a nice wall finish at pocket and helical interpolation milling.
- Durable cutting edges qualified to machine a wide range of materials.

VXF-12:

Ap1 max: .098"

fz max: .078" IPT

Perfect combination of round and square insert style.

Specifically engineered chipbreakers for powerful high-feed milling.

First choice for Soft Steel, Stainless Steel, and High-Temp Alloys. Best fit for pocketing and profiling operations.

First choice for P3 and P4 materials. Stronger edge protection for heavy roughing jobs.

Lower Cutting Forces

Geometry Strengthening/Stronger Cutting Edge Protection

Applications

1. Face milling.
2. 3D profile milling.
3. Pocket milling into full material.
4. Helical interpolation into full material.
5. Deep pocket milling into full material.
6. Dynamic/trochoidal milling.
7. Aggressive ramp milling.
8. Contour Milling.
9. Face milling deep cavities with long tool reach.
10. Z-axis contour plunge milling.

Designed to Make Your Workplace More Productive

WIDIA™ X-Feed™

WIDIA-branded X-Feed tooling was created as an application-specific portfolio to remove as much material as possible in the shortest amount of time, using a shallow depth of cut to achieve higher MRR and boost productivity.

FEED

HIGH-FEED MILLING

BOOST PRODUCTIVITY

Victory™ X-Feed For Machining Stainless Steel and Titanium

70NS Series

Designed for circular plunging and ramping, 3D machining, face milling, and pocketing applications.

Victory X-Feed To Speed Up High-Feed Machining

VXF™-7 and VXF™-12 Series

VXF is a high-feed productivity booster designed to establish new industry standards with market-leading milling grades like WS40PM.

Designed for high feed rate productivity, the M370 Series provides the latest insert technology with outstanding performance and reliability. Its double-sided concept and six cutting edges provide security and optimal metal removal with an efficient cost per edge.

- Double-sided design offers six cutting edges per insert.
- Extremely high metal removal rates.
- First choice for high-feed roughing applications.

A trusted multipurpose solution for profiling and copy applications, the M100 Series ensures a reliable platform for all of your copy milling, face milling, helical interpolation, and roughing needs.

- Thick inserts ensure reliability and consistent results.
- General purpose face and copy milling.
- Anti-rotation feature for security.
- Anti-rotation systems in larger iC inserts provide higher MRR capabilities.
- Increased chip evacuation and through tool coolant for enhanced performance.

The NOVO™ Application Provides the Digital Power

To Get Information Quicker Than Ever Before.

Find regional
All-Star product
availability using
the All-Star filter.

Export Compatibility to Mastercam®

Select tools, save into "job lists".

Interactive feed & speed calculators.

Find inventory availability.

Download 2-D and 3-D models.

Easy interface with many CAM
and tool management data systems.

Find your Local WIDIA Authorized Distributor

WIDIA™ brand cutting tools are available exclusively through a specialized network of Authorized Distributor partners whom you can count on to deliver much more than products. Our distributors know us, and more importantly, they know you. They know better than anyone in the industry how to put the global power of WIDIA to work for you — in your industry, in your region, and for your business.

WIDIA distributor partners provide technical expertise that you can count on. They will show you how to:

- Significantly reduce cycle time.
- Improve machine tool utilization.
- Achieve measurable productivity improvements.
- Take advantage of proven supply chain solutions.
- Access local inventory and best-in-class technical support.
- Request onsite demonstrations of the latest tooling technology.

And with thousands of turning, milling, holemaking, tapping, and tooling systems products available from WIDIA, you'll find everything you need from one single source.

Find your Local WIDIA Authorized Distributor by accessing our distributor finder at [widia.com](https://www.widia.com).

IMPORTANT SAFETY INSTRUCTIONS: READ BEFORE USING THE TOOLS IN THIS CATALOG

METALCUTTING SAFETY

Projectile and Fragmentation Hazards

Modern metalcutting operations involve high spindle and cutter speeds and high temperatures and cutting forces. Hot metal chips may fly off the workpiece during metalcutting. Although cutting tools are designed and manufactured to withstand high cutting forces and temperatures, they can sometimes fragment, particularly if they are subjected to over-stress, severe impact, or other abuse.

To avoid injury:

- Always wear appropriate personal protective equipment, including safety goggles, when operating metalcutting machines or working nearby.
- Always make sure all machine guards are in place.

Breathing and Skin Contact Hazards

Grinding carbide or other advanced cutting tool materials produces dust or mist containing metallic particles. Breathing this dust or mist — especially over an extended period — can cause temporary or permanent lung disease or make existing medical conditions worse. Contact with this dust or mist can irritate eyes, skin, and mucous membranes and may make existing skin conditions worse.

To avoid injury:

- Always wear breathing protection and safety goggles when grinding.
- Provide ventilation control and collect and properly dispose of dust, mist, or sludge from grinding.
- Avoid skin contact with dust or mist.

For more information, read the applicable Material Safety Data Sheet provided by WIDIA and consult General Industry Safety and Health Regulations, Part 1910, Title 29 of the Code of Federal Regulations.

These safety instructions are general guidelines. Many variables affect machining operations. It is impossible to cover every specific situation. The technical information included in this catalog and recommendations on machining practices may not apply to your particular operation.

For more information, consult the WIDIA Metalcutting Safety booklet, available free from WIDIA at +1 724 539 5747 or fax +1 724 539 5439. For specific product safety and environmental questions, contact our Corporate Environmental Health and Safety Office at +1 724 539 5066 or fax +1 724 539 5372.
