

VP700P & VP800P

VP700P

VP700P from ValCOOL is a fighting grade low-oil semisynthetic metalworking fluid. ideal in dirty environments like cast iron machining. Excellent sump life especially in machines that don't run daily.

Both products are designed with a combination of non-chlorinated extreme pressure (EP) additives and corrosion inhibitors improves tool life, surface finish, and increase speed. The versatile bio-dynamic protection package enables the working fluid in the sump to resist and react against bacteria and fungi growth in some of the dirtiest environments.

Both are excellent in • Steel • Inconel • Cast Iron • Aluminum • Stainless Steel • Copper • Titanium • Brass

FEATURES & BENEFITS

- Chlorine, sulfur, phenol and boron free
- Works in all alloys
- Excellent in both high and low pressure situations
- Bio-stability for long sump life
- Low to no foam
- Exceptional tramp oil rejection
- Outstanding surface finish
- Non-irritating to operators' skin

ValCOOL uses only raw materials not listed as carcinogenic by IRAC

VP800P

VP800P from ValCOOL is a high-performance, semisynthetic metalworking fluid, designed as an all-purpose product for use with any alloy. Excellent in high production environments where tool life sump life is critical.
